

Retake 6A: Graphs and geometry

MATH 1110, FALL 2017

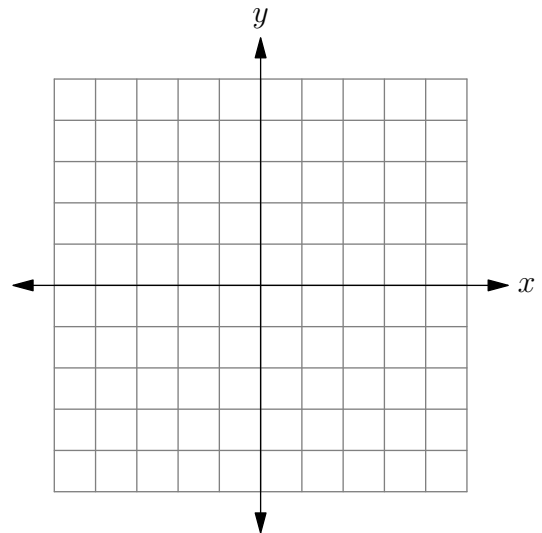

NAME:

Graph each of the functions. Your graph should show the correct shape and the coordinates of the two or three points that are easy to find.

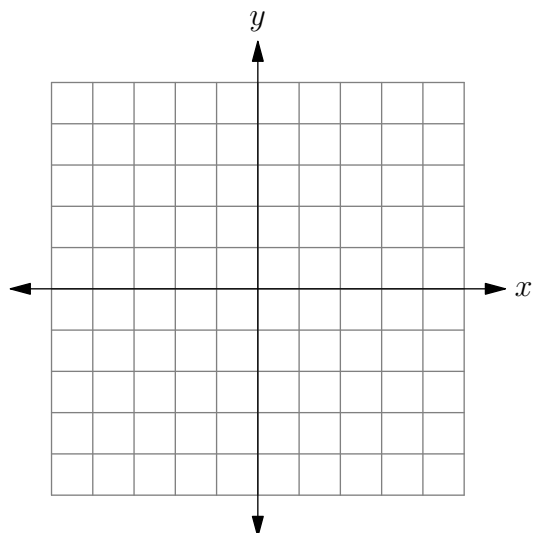

1. (3 points) $f(x) = x^3$

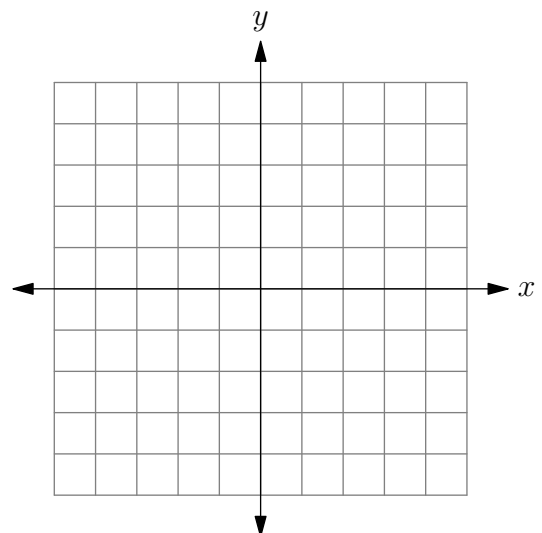

2. (3 points) $f(x) = (x + 2)^3$

3. (3 points) $f(x) = x^{1/4}$

4. (3 points) $f(x) = -x^{-2} - 3$

5. (8 points) A garden is constructed in the shape of a right triangle. The legs of the triangle have lengths 20 feet and x feet. Find a function that expresses the area of the garden as a function of x .
